This five-hour course will provide participants with an introduction to the Foundations, help you navigate your way through the document and identify strategies that support children's development and learning. Participants will spend time observing children in their classroom setting to create intentional activity plans that align with the five developmental domains of development. Registration Deadline: 10/4/2019

This 0.5 CEU is presented by Elizabeth Tuttle, Statewide Education Specialist with Child Care Resources, Inc. Books are standard materials in most classrooms, but are we getting the most out of them? How intentional is our choice of books, the way we read books, and the way we expand children's learning

through books? In this session we will discuss how building literacy skills (including emotional literacy) is critical for young children, define best practices in early literacy and writing, explore books and “Book Nooks” from the Center on the Social and Emotional Foundations for Early Learning (CSEFEL), and create expansion activities for additional children’s books that will not only enhance children’s learning in the classroom but will make it fun for you and for them! Discover new books and take home activities that you can immediately begin using! Attendance at both sessions is required.

The following trainings are scheduled as stated below OR can be held at the site’s facility upon request at a date/time requested by site, if available.
